

Ahmed Elsayed

Back-End .NET Developer

Tanta, Egypt | +201062885633 | ahmedsayed732004@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Ambitious Back-End .NET Developer with hands-on experience building RESTful APIs and web applications using ASP.NET Core, C#, and SQL Server. Proficient in applying SOLID principles, design patterns, and clean architecture to deliver scalable, maintainable software. Eager to contribute technical expertise and collaborative skills to a high-impact engineering team.

TECHNICAL SKILLS

- Back-End: C#, OOP, ASP.NET Core, Web API, MVC, .NET Framework, SignalR, RabbitMQ
- Architecture: Clean Architecture, N-Tier Architecture
- Security & Auth: JWT, ASP.NET Core Identity
- Databases & ORM: SQL Server, LINQ, Entity Framework, EF Core, ADO.NET, Redis
- Core Concepts: Problem Solving, Data Structures, Algorithms, SOLID Principles, Design Patterns
- Other Languages: Java, C++
- Networking: Computer Networking Fundamentals
- Front-End: Blazor
- DevOps & Tools: Git, GitHub, GitHub Actions, Docker
- Soft Skills: Teamwork, Research, Time Management, Communication

PROJECTS

Career Path Development Platform | [Live Demo](#) | [GitHub Repo](#)

- Built an AI-powered career guidance platform that analyzes CVs, matches users with jobs, identifies skill gaps, and generates personalized learning roadmaps.
- Designed a microservices architecture with a .NET Web API backend, React frontend, and Python FastAPI AI service supporting both local (Ollama) and cloud (Groq) AI models.
- Implemented JWT authentication, EF Core with SQL Server, CV parsing (PDF & DOCX), and cosine similarity-based job matching algorithms.
- Technologies: ASP.NET Core, C#, Entity Framework Core, SQL Server, JWT, React, Python, FastAPI, Docker, GitHub Actions.

Sportify – Sports Field Booking Application | [GitHub Repo](#)

- Built a full-featured web application enabling users to search, book, and manage sports fields.
- Implemented authentication, booking management workflows, and an admin dashboard for field owners.
- Technologies used: ASP.NET Core, C#, SQL Server, Entity Framework Core.

CPU Scheduling Visualizer | [GitHub Repo](#)

- Developed a Java Swing desktop application simulating and comparing CPU scheduling algorithms.
- Covered algorithms: FCFS, SJF, Priority Scheduling, and Round Robin with visual output.

EDUCATION

Bachelor's Degree in Computer Science — GPA: 3.29 / 4.0

Egyptian E-Learning University | Assiut, Egypt | Oct 2022 – Jul 2026

ACTIVITIES

ICPC Participant | July 2023

- Strengthened problem-solving and teamwork skills through competitive programming competitions.
